Anyone pursuing the Honors Option for LBS 332 has the choice of designing their own personal project based on the history of twentieth-century biology or biotechnology.

**Individually Designed Project**

You have great freedom to design your own project. The one thing you cannot do is write a straightforward research paper, since you’re already doing that.

Think creatively.

Design a website. Produce a documentary film. Write a play or a short story. Create an introduction to some aspect of our subject for 10- to 12-year olds. You really can do almost anything you want—provided that it shows sufficient intellectual rigor and has something to do with the history of twentieth-century biology or biotechnology.

**Qualifying**

You need to earn at least a 3.5 in the class and produce a project of a 3.5 standard or higher to qualify for an H-Option.

**Dates and Deadlines**

You need to tell me whether you intend to pursue an H-Option no later than February 5th. You must meet with me for approval and consultation no later than February 19th.

The project is due on April 24th, unless we make different arrangements.
