Assignment 9

Consider the following alternative music conjectures:

A. A person likes a particular type of music because s/he was influenced by friends, peers or relatives.

B. A person likes a particular type of music because s/he was influenced by the media (i.e., music on TV shows, movies, radio.)

C. A person likes a particular type of music because it annoyed his or her parents.

D. A person likes a particular type of music because the melody of the music just moved him or her.

In 4 to 7 “steps” derive a theory to explain one of the following alternative music conjectures. Specify three assumptions from your theory. Note which assumptions might need verification.
