SUMMARY: This Supplementary Empirical Teaching Units in Political Science (SETUPS) module is designed as an introduction to the study of elections, voting behavior, and survey data through the analysis of the 2000 United States general election. The data are taken from the AMERICAN NATIONAL ELECTION STUDY, 2000: PRE- AND POST-ELECTION SURVEY (ICPSR 3131), conducted by Nancy Burns, Donald R. Kinder, Steven J. Rosenstone, Virginia Sapiro, and the National Election Studies. A subset of items was drawn from the full election survey, including questions on voting behavior, political involvement, media involvement, candidate images, presidential approval and government performance, economic conditions, ideology, general spending and taxation, social welfare policy, foreign policy and defense issues, social and other domestic issues, civil rights and equality, and general orientations toward government. A number of social and demographic characteristics such as gender, race, age, marital status, education, occupation, income, religious affiliation, region, and employment status are also included.

UNIVERSE: All United States citizens of voting age on or before Election Day (November 6, 2000), residing in housing units other than on military reservations in the 48 coterminous states.

SAMPLING: National multistage area probability sample.

NOTE: (1) The data for this instructional subset are distributed by ICPSR through an arrangement with the American Political Science Association (APSA). Manuals for use with the data are available from the APSA Division of Educational Affairs. (2) The codebook is provided by ICPSR as a Portable Document Format (PDF) file. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided on the ICPSR Web site.

EXTENT OF COLLECTION: 1 data file + machine-readable documentation (PDF) + SAS data definition statements + SPSS data definition statements + Stata data definition statements
