1. Corey, Corey, & Callanan suggested an eight step approach to making ethical decisions. Please list these eight steps.

   A. Identify and list the “appropriate” and “inappropriate” actions with respect to participation in and presence at the commission of an act of assisted suicide identified by the Policy Statement.
   B. What was the basis for identifying the particular “inappropriate” actions as inappropriate?

3. Please list and define the four elements that make up malpractice.

4. Define countertransference.
   The text presented examples of eight ways that countertransference could present an ethical concern. Please list each of them. For each item listed describe how the worker would be meeting his or her needs rather than the client’s.

5. Seven situations were listed which abrogate privileged communication. Please list them.

6. The NASW Code of Ethics outlines six core values and their associated ethical principles. Please list them.
