**Project Narrative/Report**

This should be a first person description of your final project. Make entries for every step of the process. Identify your role in each stage and also that of your group mates. Analyze the decision making process at each stage. What were some of the pit falls along the way, and how did you address them? How were the group dynamics? How did you improve morale?

What worked? What could have been done differently? How would you handle a similar situation in your future production life?

Lastly, compile a summary page about the project as a whole. You need to include what you learned, what would you do differently, if you were able to identify you own niche (with strengths and weaknesses) and anything else you would like to mention.

The key is not the number of words you put in, it is how you bring alive this project in the mind of the reader.
