  - Focus Group 1. Nine Women, Socioeconomic Classes C and D, without In-Home Water and Sewer Connections, Residents of Barageel and Bashteel Areas, Cairo Governorate | 259 |
  - Focus Group 2. Four Women, Socioeconomic Classes B and C, with In-Home Water and Sewer Connections, Residents of Embaba Area, Giza Governorate | 265 |
Focus Group 3. Eight Women, Socioeconomic Classes B and C, with In-Home Water and Sewer Connections, Residents of Embaba Area, Giza Governorate ............................ 277

Focus Group 4. Eight Women, Socioeconomic Class B, with In-Home Water and Sewer Connections, Residents of Agouza, Dokki, and Mohandasin Areas, Giza Governorate ............................ 291

Focus Group 5. Eight Women, Socioeconomic Classes D and E, without In-Home Water and Sewer Connections, Residents of Dar El Salam and Elmasara Areas, Cairo Governorate ............................ 299

Focus Group 6. Eight Women, Socioeconomic Class D, with In-Home Water and Sewer Connections, Residents of Shoubra Area, Cairo Governorate ............................ 307

Focus Group 7. Eight Women, Socioeconomic Classes C and D, with In-Home Water and Sewer Connections, Residents of Rod El Farag and Tura Areas, Cairo Governorate ............................ 315

Focus Group 8. Seven Men, Socioeconomic Class D, without In-Home Water and Sewer Connections, Residents of Pyramids Area, Giza Governorate ............................ 329

Focus Group 9. Eight Women, Socioeconomic Class D, without In-Home Water and Sewer Connections, Residents of Pyramids Area, Giza Governorate ............................ 339

Focus Group 10. Nine Men, Socioeconomic Classes C and D, with In-Home Water and Sewer Connections, Residents of Shoubra Area, Cairo Governorate ............................ 341
Focus Group 11. Eight Women, Socioeconomic Class C, with In-Home Water, but without In-Home Sewer, Residents of Beba and El Wasta Villages, Giza Governorate ............................................. 349

Focus Group 12. Nine Women, Socioeconomic Class E, without In-Home Water and Sewer Connections, Residents of El Askanda Rani Village, Giza Governorate ............................................. 355

Focus Group 13. Eight Women, Socioeconomic Class C, with In-Home Water and Sewer Connections, Residents of Shoubra Area, Cairo Governorate ............................................. 361

Focus Group 14. Nine Women, Socioeconomic Class C, without In-Home Water and Sewer Connections, Residents of Shoubra Area, Cairo Governorate ............................................. 369

Focus Group 15. Eight Women, Socioeconomic Classes B and C, with In-Home Water and Sewer Connections, Residents of Zeitoun and Dahar Areas, Cairo Governorate ............................................. 375

Appendix F. Final English Questionnaires Used in Cairo Household Survey ............................................. 389

Water Reliability Questionnaire ............................................. 391
Water Network Installation Questionnaire ............................................. 423
Sewer Flooding Questionnaire ............................................. 449
Sewer Connection Questionnaire ............................................. 479

Appendix G: Final Arabic Questionnaires Used in Cairo Household Survey ............................................. 503

Water Reliability Questionnaire ............................................. 505
Water Network Installation Questionnaire ............................................. 541
Sewer Flooding Questionnaire ............................................. 575
Sewer Connection Questionnaire ............................................. 611
List of Tables

Volume II: Appendices

Table A.1. Selected Characteristics of Respondents’ Dwelling in Mansoura ............................................... 149

Table A.2. Selected Family Characteristics of Sample Households, Mansoura ............................................... 150

Table A.3. Water Service Quality and Payment Transactions, Mansoura ............................................... 152

Table A.4. Probit and Household Benefit Estimates for Providing Reliable, All Day Water Service in Mansoura, 1995 Egyptian Pounds per Month ................................ 154

Table B.1. Project to Improve Water Service Reliability by Cost Threshold, Cairo ............................................... 156

Table B.2. Project to Prevent Loss of Reliable Water Service by Cost Threshold, Cairo ............................................... 157

Table B.3. Project to Install a Neighborhood Water Network by Cost Threshold, Cairo ............................................... 158

Table B.4. Project to Eliminate Neighborhood Sewer Overflows by Cost Threshold, Cairo ............................................... 159

Table B.5. Project to Prevent Neighborhood Sewer Overflows by Cost Threshold, Cairo ............................................... 160

Table B.6. Project to Install an In-Home Sewer Connection by Cost Threshold, Cairo ............................................... 161

Table B.7. Project to Improve Water Service Reliability by Cost Threshold, Mansoura ............................................... 162
Table B.8. Project to Prevent Loss of Reliable Water Service by Cost
Threshold, Mansoura ..................................... 163

Table C.1. Projections of Factors Affecting Water Use .......................... 169
