Key terms - Injury and Illness (Ch14)

Analgesia
Brain tumor
cerebral edema
Electrical Stimulation Therapy
Seizures (generalized, partial)
Glioma
Local anesthesia
Malignant
Multiple Sclerosis
Neurogenesis
Neurological AIDS
Nociceptors
NSAIDs
Opioids
Pain
Plaques/lesions
Specific methods of treating brain tumors
Stroke, progression of events afterwards
tPA
primary brain tumor
metastatic (secondary brain tumor)
HIV-associated neurocognitive disorder (HAND)
peripheral neuropathy
traumatic brain injury
cerebrospinal fluid
spinal cord injury
opioids
COX enzymes
endorphins
epilepsy
