Koshiki no Kata

by Noboru Saito

The techniques in this kata were designed for armor-clad warriors of the Kito Ryu Jujitsu school. Dr. Jigoro Kano studied the Kitoryu Jujitsu and he decided to preserve the techniques in Koshiki no Kata because of the extent to which they embody the principle and techniques of Kodokan Judo and also very useful for training of human mind.

Key points for practice:

1. It is essential while performing the kata to imagine oneself wearing heavy armor.
2. The kata is divided into two parts, OMOTE (front) - 14 techniques and URA (back) - 7 techniques.

Kito Ryu school explains the kata as follows:

Action is started by KI “sprit” and end by KI. It is called Ki no Dan (steps). However, as there are four seasons in a year, yet we cannot distinguish the change of each season clearly. The purpose of OMOTE practice is to teach how techniques develop and when they end. Each movement is done very slowly and clearly. Tori must show his response, using the uke’s attack to control, and when to throw uke. Keep the body posture correct and keep the mind calm throughout OMOTE practice. But, on other hand, the purpose of URA practice is to teach the application of OMOTE practice. Tori must respond to the uke’s attack freely and without taking many steps. Perform the URA movements smoothly, swiftly and strongly without stopping between all seven techniques.

Sequence of kata:

**Omote:**

1. Tai (Ready posture) 8. Uchikudaki (Smashing)
2. Yume no Uchi (Dreaming) 9. Tani Otoshi (Valley drop)
3. Ryokuhi (Strength dodging) 10. Kuruma-daoshi (Wheel throw)
4. Mizu-guruma (Water wheel) 11. Shikoro-dori (Grabbing the neckplates)
5. Mizu-nagare (Water flow) 12. Shikoro-gaeshi (Twisting the neckplates)
6. Hikiotoshi (Draw drop) 13. Yudachi (Shower)
7. Kodaore (Log fall) 14. Taki Otoshi (Water fall drop)

**Ura:**

1. Mikudaki (Body smashing)
2. Kuruma-Gaeshi (Wheel throw)
3. Mizu-Iri (Water plunge)
4. Ryusetsu (Willow snow)
5. Sakaotoshi (Heading fall)
6. Yukiore (Snow break)
7. Iwa Nami (Wave on the rocks)
Starting positioning

Tori (left side - as seen from shomen) and uke stand apart about 5.4 meters. Turning toward the shomen, they perform a standing bow. This is followed by a kneeling bow - left knee down, right knee down, then place hands on the mat (perform as though wearing heavy armor).

When ending the kata, a kneeling bow is done first and followed by a standing bow.

Note: Standing bow is optional instead of a kneeling bow.
