Start a Career as an Agriscience Teacher at MSU!

What does an Agriscience Teacher do?
Ag Educators prepare youth for future careers in various fields including food science and veterinary science, farming, ranching, teaching, marketing, management, social services, and MANY more! These careers are vital to our country because after all, everybody needs to eat. They serve students through classroom and laboratory work, experiential learning, and leadership and personal skill development.

Ag Ed Model...
Agriscience teachers have 3 responsibilities that fall under the Ag Ed Model: 1.) Classroom instruction; 2.) SAE or Supervised Agricultural Experience; and 3.) the FFA Chapter Advisor. Being the largest youth leadership organization in the country, Ag Teachers have a large responsibility to help lead their students.

The Need for Ag Teachers...
Right now there is a HUGE need for Agriscience Teachers across our great nation! This amazing career needs young and vibrant new teachers like you to lead and educate our youth about agriculture. Team Ag Ed has developed a plan called “10 x 15”. This plan is to increase the number of Agriscience programs in the United States to 10,000 by the year 2015.

Take courses at MSU centered around things like...
* Biology, Ecology, and Zoology
* Plant & Soil Science
* Animal Science
* Fisheries & Wildlife
* Farm Management
* Horticulture
* Environmental Science
* Communications
* Forestry
* And of course, Education!!!!!!!!!

MSU offers plenty of opportunities outside of just the classroom!
* Clubs such as the Leadership in Environmental and Agricultural Fields (LEAF) club, Collegiate FFA, and many more!
* Alpha Gamma Rho and FarmHouse fraternities and Sigma Alpha sorority
* Specializations in other areas of interest
* Scholarships
* Study Abroad around the world
* More internships than you can imagine!
