The best way to study for the test is to go back over the two problem sets and the argument analysis exercises we have done in class. The exam will consist of exercises that evaluate your grasp of the concepts you’ve studied, although it is possible that I will ask you questions that are different in format from the ones you’ve seen. Still, if you have mastered the problem sets and are comfortable taking a chunk of text and extracting an argument from it, you are in good shape for the exam.

Below are additional exercises for which I will provide a key. There are no sample exercises here from Ch. 1, but the work you did in Ch. 1 is fair game for the exam. The key to this is posted to the Handouts page as well. Please let me know if you have any questions.

Ch. 2

- II. 12-22
- III. odds
- V. 6-10
- VI. 2, 4, 6, 8
- VII. 4, 5
- VIII. 2, 4, 6, 8

Ch. 3

- I. Evens
- II.
- III. 4-6
- IV. 3, 4
- VII. 1-3

Ch. 5

- V. 2, 4, 6, 8-12
- VII.

Ch. 13

- I. 1-3
- III. 3
- VI. 1-3

Ch. 14

- IV. 1-3
