Behavior of Waves Poster

In this assignment you will make four columns. Each column should have a picture that represents the particular wave behavior. For example if you were going to use an echo for reflection you could draw sound waves reflecting off a barrier. The four boxes are reflection, refraction, diffraction, and interference.

In each box you should include:

- The title of the behavior (what are you drawing reflection, refraction, etc.)
- A definition of each behavior
- A picture of each behavior
- What type of wave it is transverse or longitudinal
- What type of wave it is mechanical or electromagnetic
