

David C. Zhu, Ph.D.
Professor of Radiology, Psychology and
(adjunct) Electrical & Computer Engineering
Cognitive Imaging Research Center
846 Service Road
Michigan State University
East Lansing, MI 48824
Phone: (517) 884-3345
email: David.Zhu@radiology.msu.edu

EDUCATION

Ph.D., Biomedical Engineering, University of California, Davis, December 1999.
Dissertation: Magnetic Resonance Pulse Sequences and Analytical Techniques for Breast Cancer Detection and Cardiovascular Flow.
Advisor: Michael H. Buonocore, M.D., Ph.D.

M.S., Biomedical Engineering, California State University, Sacramento, August 1996.
Thesis: Odd-Number Hybrid Echo Planar Magnetic Resonance Imaging.
Advisor: Michael H. Buonocore, M.D., Ph.D.

B.S., Electrical and Electronic Engineering, California State University, Sacramento, May 1996.

B.A., Molecular & Cell Biology, emphasis: Biochemistry, University of California, Berkeley, May 1992.

EXPERIENCE

- 7/2016 – present **Professor of Radiology, Psychology and (adjunct) Electrical & Computer Engineering**, Michigan State University, East Lansing, Michigan
- 7/2013 – 7/2016 **Associate Professor of Radiology and Psychology**, Michigan State University, East Lansing, Michigan
- 4/2009 – 7/2013 **Associate Professor of Psychology and Radiology**, Michigan State University, East Lansing, Michigan
- 7/2011 – 7/2016 **Adjunct Associate Professor of Electrical & Computer Engineering**, Michigan State University, East Lansing, Michigan
- 2010 – present Faculty member of Neuroscience Program, Michigan State University, East Lansing, Michigan
- 2007 – present Faculty member of Cognitive Science Program, Michigan State University, East Lansing, Michigan
- 4/2005 – 4/2009 **Assistant Professor of Psychology and Radiology**, Michigan State University, East Lansing, Michigan
- 4/2005 – present

Additional roles/services during the above appointments:

- Lead of the Cognitive Imaging Research Center.
 - Develop and organize neuroimaging research seminars for the Cognitive Imaging Research Center.
 - An MRI physicist for the Cognitive Imaging Research Center, and Departments of Radiology and Psychology.
 - Collaborate and provide consultation on MR physics, fMRI protocol setup, experimental design and data analysis.
 - Oversee the data quality of the state-of-the-art 3T MR research scanner and work with GE field engineers to resolve issues.
 - Develop and support pulse sequences.
 - General fMRI equipment support.
 - Develop and support data analysis software.
- 8/2002 – 4/2005 **Research Associate (Assistant Professor) of Radiology**, Brain Research Imaging Center, Department of Radiology, University of Chicago, Chicago.
- MR methodology development for brain research, including functional MRI.
 - Maintained the state-of-the-art 3T MR research scanner.
 - MRI physics and MR system consultation to investigators.

- 1/2000 – 8/2002 **MR Applications Engineer**, GE Medical Systems, Waukesha, Wisconsin
- Pulse sequence development with an emphasis on Fast Spin Echo sequences.
 - Integration of the EXCITE data acquisition system.
 - Resolving MR system issues.
- 6/1995 – 11/1999 **Postgraduate Researcher**, Department of Radiology, University of California, Davis.
- MR pulse sequence development.
 - Developed linear regression, segmentation and pattern recognition algorithms for breast cancer detection.
 - Performed data analysis and data management for brain functional MRI studies.
- 6/1992 - 8/1993 **Production Assistant Chemist**, MDL Information Systems Inc., San Leandro, California.
- Production and quality control on chemical databases.

Current Research Focuses

- MRI of mild traumatic brain injury/concussion (Primary collaborators: Drs. David Kaufman and Concussion Neuroimaging Consortium (<http://www.concussionimaging.org>))
- MRI of normal aging, Alzheimer's disease (AD), and AD risk reduction (Primary collaborators: Dr. Rong Zhang at University of Texas Southwestern Medical Center and Dr. Andrea Bozoki)
- MR imaging technique development (Collaborators: Drs. Jie Huang, Tongtong Li and Selin Aviyente)
- Brain MRI: Speech production in normally fluent and stuttering speakers, especially children (Collaborator: Dr. Soo-Eun Chang)

CITIZENSHIP: U.S. citizen.

PATENT

David C. Zhu, J. Kevin DeMarco, Anthony T. Vu. Apparatus and method for detecting and classifying atherosclerotic plaque hemorrhage. US Patent # 7,705,593. Date of award: April 27, 2010.

RECENT INVITED TALKS AT FACULTY SEMINARS OR COLLOQUIUMS

- MSU Cognitive Imaging Research Center Neuroimaging Series, Fall 2014:
Introduction of cerebral blood flow measurement using arterial spin labeling technique.
- MSU Cognitive Imaging Research Center Neuroimaging Series, Spring 2014:
Resting-State fMRI and Some Update of its Application to Concussion Research.
- Electrical and Computer Engineering Research Seminar, Fall 2013:
Resting-State Functional Magnetic Resonance Imaging and Applications for Brain Research.

RECENT INVITED TALKS OUTSIDE MSU

- University of Michigan Functional MRI Symposium, September 2015:
Neuroimaging of sports-related concussion
- Advanced Imaging Research Center, UT Southwestern Medical Center, August 2015:
Resting-State Functional Magnetic Resonance Imaging and Applications for Brain Research
- Institute for Exercise and Environmental Medicine, Texas Health Presbyterian Hospital Dallas, August 2015:
Resting-State Functional Magnetic Resonance Imaging and Applications for Brain Research
- Big Ten/CIC-Ivy League Traumatic Brain Injury Research Collaboration Summit, July 2014:
A Potential Biomarker in Sports-Related Concussion: Brain Functional Connectivity Alteration of the Default-Mode Network Measured with Longitudinal Resting-State fMRI over 30 Days.
- Brain-Mind Institute International Conference, Summer 2013:
Resting-State fMRI and Applications
- Institute for Exercise and Environmental Medicine, Texas Health Presbyterian Hospital Dallas, March, 2013:
Characterize the Periodic Motions of Blood Flow, Cerebrospinal Fluid and Tissue of the Brain with CINE Phase-Contrast MRI

PROFESSIONAL MEMBERSHIPS

- International Society for Magnetic Resonance in Medicine.
- American Association of Physicists in Medicine.

The Organization for Human Brain Mapping.

HONORS and AWARDS

Sigma Xi Scientific Research Society in 2006

Mimics Innovation Award 2006: Mimics - an indispensable tool for patient-specific image analysis. By: Mauli Modi, Rajitha Mullapudi, MahadevaBharath R. Somayaji, Michalis Xenos, Andreas A. Linninger, David C. Zhu and Richard Penn

Mimics Innovation Award 2005: Mimics image reconstruction for computer-assisted brain analysis. By: Andreas A. Linninger, Michalis Xenos, Srinivasa. Kondapalli, MahadevaBharath. R. Somayaji, David C. Zhu and Richard Penn.

Paul C. Hodges Alumni Society Research Award in 2003

GE Medical Systems Management Award in 2002

Tau Beta Pi Engineering Honor Society in 1995

U.C. Berkeley Honor Students' Society in 1990-1991

Undergraduate Scholarship in 1990 at U.C. Berkeley

Chemistry Annual Award of 1989 at Laney College

RESEARCH SUPPORT

Current

Award # 1612867 (PI: Sakhanenko, Co-PI: Zhu) \$119,998 total cost 08/15/2016-07/31/2019

National Science Foundation

Nonparametric estimation of integral curves and surfaces

Motivated by diffusion-weighted magnetic resonance imaging (MRI) techniques such as Diffusion Tensor Imaging (DTI) and High Angular Resolution Diffusion Imaging, we plan to investigate a detailed list of issues pertinent to statistical integral curve estimation.

Role: Co-PI (Year 1: 0.5 month effort per year. Years 2 and 3: 1 month effort per year.)

2R01DC011277 (PI: Chang, MSU subcontract PI: Zhu)

NIH MSU amount: \$1,634,130 total cost 07/01/2016 - 06/30/2021

A longitudinal study of neural network development in children who stutter

The overall objective of this application is to find broader neural network based mechanisms that underlie persistent stuttering.

Role: MSU site-PI, co-investigator and MRI physicist (4% annual effort)

1R01AG049749 (Overall Contact PI: Zhang, MSU site-PI: Zhu) (Multi-center Phase II trial)

NIH/NIA MSU amount: \$502,698 total cost 01/15/2016 - 11/30/2020

Exercise and Intensive Vascular Risk Reduction in Preventing Dementia

This study aims to determine the independent and combined effects of intensive pharmacological reduction of vascular risk factors and aerobic exercise on neurocognitive function in older adults at high risk for Alzheimer's disease.

Role: MSU site-PI, co-investigator and lead of the Imaging Core (20% annual effort)

1R01EY022727 (PI: Liu) \$1,732,014 total cost 07/01/2012 – 06/30/2017

NIH/NEI

Neural Mechanisms of Attentional Priority for Features and Objects

The goal of this project is to characterize the neural substrates for controlling attention to non-spatial properties such as features and objects.

Role: Co-investigator and MRI physicist (10% annual effort)

Completed

1R01DC011277 (PI: Chang) \$1,841,679 total cost 09/29/2010 – 06/30/2016

NIH ARRA/NIDCD

Sexual Dimorphism of Neural Development Underlying Childhood Stuttering

The overall objective of this project is to identify structural and functional neural markers of stuttering close to symptom onset and determine gender-specific brain developmental trajectory markers that serve to differentiate those children who do or do not recover from stuttering.

Role: Subcontract PI (final year), co-investigator and MRI physicist (9-20% annual effort)

1R21HD078566 (PI: Pontifex) \$419,926 total cost 04/10/2014 - 03/31/2016
NIH/NICHD

Physical-activity Induced Transient Changes in Hemodynamics (PITCH)

This proposal explores the validity of two hypothesized models of physical-activity induced transient changes in hemodynamics (PITCH) as potential neurocognitive mechanisms underlying improvements in cognition associated with acute exercise.

Role: Co-investigator and MRI physicist (8.3% annual effort)

1R03DA033455 (PIs: Pleskac and Liu) \$225,400 total cost 04/01/2013 – 03/31/2014
NIH/NIDA

Neural mechanism of decision formation during perceptual and risky decisions.

This proposal aims to isolate the neural mechanism of the deliberation process during risky decision making.

Role: MRI physicist (5% annual effort)

MSU IRGP (PI: Zhu) \$39,999 total cost 12/15/2008 – 03/15/2011
Apply Resting-state fMRI and FDG-PET to Understand the Neural Networks Affected by Alzheimer's Disease

Role: PI (20% annual effort)

Broitman Foundation (PI: Semrud-Clikeman) \$269,000 total cost 09/07/07-09/06/10
Research in Nonverbal Learning Disabilities

Use fMRI and volumetric MRI to study children with nonverbal learning disabilities, Asperger's Syndrome, and typically developing children. The goal of this study is compare these groups on measures of social understanding and perception both behaviorally and with neuroimaging.

Role: MRI physicist (5% annual effort)

American Heart Association (PI: DeMarco) \$143,000 total cost 07/01/08-06/30/10
Use of *in vivo* 3T MR to Characterize Plaque in Patients with Carotid Stenosis and Correlate MR Findings with Symptoms

Role: Collaborating Investigator

Subcontract of Dr. Xue-Qiao Zhao's NIH grant (RO1 HL088214-01A1) at the University of Washington, \$4,055 total, 11/1/08-1/31/09

Carotid Plaque Characteristics by MRI in AIM-HIGH

Role: MSU subcontract PI

GE Healthcare (PIs: DeMarco and Zhu) \$75,000 total cost 09/01/06 – 08/30/08
Evaluating the Presence and Type of Carotid Plaque Hemorrhage Using *in vivo* 3T MRI

Role: Co-PI.

University of Chicago Paul C. Hodges Alumni Society Research Award in 2003 (PI: David C. Zhu), 1/1/04 - 6/30/05
Triple Spiral Pulse Sequence and Analytical Technique for Functional MRI Study on 3T Systems

The goal of this research is to develop a novel triple spiral sequence and a multivariate analysis technique that can further reduce the image signal loss due to susceptibility artifacts, enhance the sensitivity of fMRI, and provide a high-level localization of neural activity for fMRI studies on 3T systems.

Role: PI

TEACHING

Classroom Teaching:

PSY 890 (1-3 unit): Weekly Cognitive Imaging Research Center fMRI seminar (Spring 2007)

PSY 992 (3 units): Introduction to Functional Magnetic Resonance Imaging (Fall 2007)

PSY 890 (1-3 units): Independent study on fMRI (Fall 2007)

PSY 890 (1-3 units): fMRI research experience (Spring 2008)

PSY 992 (3 units): Introduction to Functional Magnetic Resonance Imaging (Fall 2008)

PSY 890 (1-3 units): Independent study on fMRI (Fall 2008)

PSY 992 (3 units): Introduction to Functional Magnetic Resonance Imaging (Spring 2010)

PSY 890 (1-3 units): Independent study on fMRI (Spring 2010)
 PSY 992 (3 units): Introduction to Functional Magnetic Resonance Imaging (Spring 2011)
 PSY 491 (1 unit): Participant Psychological Project (Spring 2011)
 PSY 992 (3 units): Current Methods in Cognitive Neuroscience (Fall 2011) (guest instructor)
 PSL 429 (3 units): Biomedical Imaging Methods (Fall of 2012) (one of multiple instructors)
 PSY 992 (3 units): Introduction to Functional Magnetic Resonance Imaging (Spring 2013)
 PSY 490 (1 unit): Independent Study (Spring 2014)
 PSL 429 (3 units): Biomedical Imaging Methods (Fall of 2014) (one of multiple instructors)
 PSY 992 (3 units): Current Methods in Cognitive Neuroscience (Spring 2015) (guest instructor)
 PHM/PSL/ZOL/NEU 827 (4 units): Physiology & Pharmacology of Excitable Cells (Fall 2015) (one of multiple instructors)

Research Seminar:

Taught and organized weekly Cognitive Imaging Research Center fMRI seminar series (Fall 2006)
 Organized the campus-wide weekly MRI and fMRI research seminar series (Spring and Fall of 2008)
 Organized the campus-wide bi-weekly neuroimaging research seminars (Fall 2011 - present)

Mentorship:

Post-doctoral fellows currently collaborating with me on projects:

Dr. Takashi Tarumi (UT Southwestern Medical Center) on MRI of aging.

Post-doctoral fellows previously collaborating with me on projects:

Mohammad El-Dakdouki (Chemistry) on MR molecular imaging.

Shantanu Majumdar (Radiology) on MRI techniques.

Graduate students currently collaborating with me on projects:

Liangliang Zhang (Ph.D. student in Statistics and Probability) on integration of neuroimaging and clinical dataset.

Yingjie Li (Ph.D. student in Statistics and Probability) on integration of neuroimaging and clinical dataset.

Hamidreza Gharahi (Ph.D. student in Mechanical Engineering) on MR imaging.

Ashley Hannah (Ph.D. candidate in Neuroscience Graduate Program. Dissertation Committee Member) on neuroimaging of Alzheimer's disease.

Zhe Wang (Ph.D. student in Electrical and Computer Engineering. Dissertation co-advisor) on fMRI data analysis technique development.

Marisel Villafañe-Delgado (Ph.D. student in Electrical and Computer Engineering. Dissertation Committee Member) on resting-state fMRI data analysis technique development.

Graduate student collaborators who have graduated:

Paul Beach (Ph.D. 2014 in Neuroscience Graduate Program. Dissertation Committee Member) on neuroimaging of Alzheimer's disease.

Hovig Kouyoumdjian (Ph.D. 2014 in Chemistry. Dissertation Committee Member) on molecular imaging of amyloid plaque.

Meghan Caulfield (Ph.D. 2014 in Neuroscience, visiting student from Rutgers University Biomedical and Health Sciences) on neuroimaging of anxiety.

Igor Korolev (Ph.D. 2013 in Neuroscience Graduate Program. Dissertation Committee Member) on neuroimaging of Alzheimer's disease.

Lan Yang (Ph.D. 2012 in Neuroscience Graduate Program. Dissertation Committee Member) on fMRI of pain processing.

Jesse Bledsoe (Ph.D. 2012 in Psychology. Dissertation Committee Member) on neuroimaging of ADHD.

Shantanu Majumdar (Ph.D. 2011 in Electrical and Computer Engineering. Dissertation co-advisor) on diffusion-weighted MR imaging methods.

Alena Patsenka (Ph.D. 2010 in Psychology. Dissertation Committee Member) on fMRI of decision making.

Matthew Husband (Ph.D. 2010 in Linguistic and the Cognitive Science Program.) on fMRI of language processing.

Kheireddine Elboubbou (Ph.D. 2010 in Chemistry) on MR molecular imaging.

Yiming Deng (Ph.D. 2009 in Electrical and Computer Engineering. Dissertation Committee Member) on PET and MRI methods.

Christopher D. Bolin (M.S. 2009 in Mechanical Engineering. Thesis Committee Member) on MRI blood flow quantification.

Jeremy Smith (Ph.D. 2008 in Neuroscience Graduate Program. Dissertation Committee Member) on fMRI of memory consolidation.

Undergraduate student currently mentored by me:
Collin Brooks on neuroimaging.

Undergraduate student mentored by me who has graduated:
Lisa Kelly (B.S. 2014 in Computer Science) on fMRI.
